Change log

Date	Change Description
2021-10-14	Initial release.

Introduction

This document provides the following information for the Fortinet IPS Engine 7.0 build 043.

- [Product integration and support on page 6](#)
- [Resolved issues on page 7](#)
- [Known issues on page 8](#)

IPS Engine 7.0 build 043 is a built-in release for FortiOS 7.0.2. It is not a release to FortiGuard.

For additional FortiOS documentation, see the [Fortinet Document Library](#).

Product integration and support

The following table lists IPS engine product integration and support information:

FortiOS	7.0.2
---------	-------

Resolved issues

The resolved issues listed do not list every bug that has been corrected with this release. For inquiries about a particular bug, contact [Customer Service & Support](#).

Bug ID	Description
645848	FortiOS provides self-signed CA certificate intermittently with flow-based SSL certificate inspection.
678890	IPS engine stalled. Alarm clock crashes at <code>pat_search_nocase</code> .
687885	Inconsistent system performance with RFC2544 IXIA breaking point testing.
691338	Download drops to 0 kbps and slow website access after firmware upgrade.
709968	FortiGate drops UDP port 5440 traffic after rebooting both FortiGates.
712352	Firewall goes into conserve mode and IPS consumes high memory.
720943	UTM does not work when the GRE session is created by a specific direction.
721435	Download breaks when the policy is in flow base mode with deep inspection and the NCP application is used on the host
728492	Unable to load instagram.com from Chrome browser without changing <i>TLS Post-Quantum Confidentiality</i> flag from default to enabled.
729249	Web Filter categorizes private IP address/local URLs as newly observed domains.
730137	Unable to access website when the policy is in flow based with web filter enabled.
731459	In NGFW policy mode, disabling security policy does not stop current traffic passing the firewall.
735893	After Chrome 92 update, FortiOS 6.2, 6.4 and 7.0 cannot reach specific websites in proxy mode with UTM applied. In flow mode everything works as expected.
736906	The default <code>np-accel-mode basic</code> causes sporadic HTTPS deep inspection transaction failures with Application Control.
738144	The UTM function only works for a few seconds in GRE session.
741643	Traffic may be incorrectly blocked or matched with the wrong security policy in NGFW policy mode
744352	Some websites open very slow in flow mode plus SSL deep inspection.
744888	FortiGate drops SERVER HELLO when accessing website using flow based policy with deep SSL inspection.
745163	Website ad.doubleclick.net cannot open in flow mode with deep packet inspection and a security profile in Chrome.

Known issues

There are no known issues with this release of IPS engine version 7.0 for FortiOS.

To report a bug, please contact [Customer Service & Support](#).
